Key project activities

The Gardens by the Bay

This iconic project, incorporating a conservatory complex, themed gardens and unique Supertrees aims to improve quality of life by enhancing greenery and flora in the city. Providing quantity surveying and cost management services for all aspects of the project with a focus on life cycle costing to ensure cost efficiency. Regular cost in use studies supported the delivery of sustainable design features.

Changi Airport

Appointed to ensure the cost efficient expansion of one of the largest transportation hubs in Southeast Asia.

Bukit Timah Rail Corridor

A 24km "green corridor" providing a unique public space whilst connecting homes, work places and schools. Appointed to input into a Concept Master Plan to enrich the experience whilst improving accessibility and connectivity.

Outram Medical Campus

Providing project management services and

assisting in the procurement of the full design team, to develop the detailed masterplan for the new Outram Medical Campus. The development will incorporate a hospital, community health facilities, and a specialist treatment center to serve the community.

The Sail at Marina Bay

Responding to the housing needs of Singapore with two 63 and 70 storey residential towers including 1,111 units and a retail podium. Delivering full quantity surveying services to address cost drivers and maximise value.

Arcadis brings global water expertise to Singapore to respond to the city's key water challenges. We are developing new water services through strategic partnerships and long term investment. This builds on our existing partnerships, including those with Changi Airport Group, the Ministry of Health and Temasek through the Mandai Wildlife Reserve project. We are partnering with Government Agencies pushing the Smart and Resilient Cities agenda and developing strategies to realise these objectives through creativity and innovation to improve the quality of life.

Our Focus

Mobility

Supporting the delivery of a leading aviation hub through our work with Changi Airport on an extensive program to build a new terminal and an airport city. Working on several MODE (Mobility Oriented Development) projects, such as Northpoint Singapore, to enhance connectivity and support a modal shift to public transport.

Resilience

Working with leading developers and agencies on the development of strategic plans for a resilient and smart city. Thought leadership and research on the potential for underground cities and at the forefront of sustainable construction and management through Green Mark. Working on water infrastructure projects and power stations to meet the future needs of Singapore.

Regeneration

Providing cost management and project management services to rejuvenate old buildings to be current and sustainable whilst maximising value. Working with fund managers, chiefly AEW, Alpha Investment Partners and Macarthur Cook on regeneration projects through Asset Enhancement Initiatives (AEIs) to deliver value to our clients.
