Key project activities

High Speed Two (HS2)

Appointed to develop the benefits strategy, map and realisation plan to support the delivery of regeneration and growth benefits resulting from the delivery of the HS2 rail line.

Olympicopolis

Delivering a new £370 million campus for University College London and a dynamic new hub for 21st century London. Providing cost, project and risk management to deliver this key part of a world class education and cultural district on Queen Elizabeth Olympic Park,

projected to create 3,000 jobs and an extra £1.8 billion of economic value from the area.

Camden Better Homes

Advising Camden Council on housing strategy, solutions, funding and regeneration options to meet their housing tenure targets.

Crossrail 2

Providing essential support to TfL in producing the business case, selecting a route option, completing the concept design, securing funding and preparing the project for consultation. This £27 billion

infrastructure project will play a vital role in supporting London's growth adding 10 per cent more rail capacity and transporting up to 90,000 people in the morning peak.

Thames Tideway Tunnel

Part of an embedded team of consultants working on the Thames Tideway Tunnel, providing commercial and project management services, strategic procurement advice and contract administration. This £4.2 billion essential infrastructure project will upgrade London's sewerage system to meet the demands of the 22nd century and create a cleaner, healthier River Thames.

As a Partner of the Global Cities Business Alliance, Arcadis is developing strategies to help leading global cities to be competitive environments for business, maintain their vibrancy as centres for talent, creativity and innovation and be good places to live.

Our Focus

Mobility

Supporting the delivery of strategic transport infrastructure including Crossrail 2 and High Speed Two (HS2) to enhance connectivity and public transport capacity. Working with Transport for London (TfL) to reduce congestion and improve journey times whilst promoting development and enhancing the urban realm.

Resilience

Preparing London for the future through our work with Thames Water to deliver capital investment programmes for essential improvements to water infrastructure. Ensuring the successful delivery of the Thames Tideway Tunnel to meet the needs of a growing population, reduce pollution in the River Thames and improve quality of life.

Regeneration

Advising on housing strategy and regeneration opportunities to respond to London's housing challenge. Renewing depleted assets and unlocking the potential of regeneration areas to deliver value for our clients. Delivering world class development schemes including Earls Court, Chelsea Barracks and Imperial West.
