

# OUR SPEAKERS

March 14th 2017  
Rotterdam from 12.00 - 17.00

**CARSTEN ASSMANN**

EHS Director Europe North at Arcadis

Carsten has more than 20 years experience in oil & gas, energy, chemicals industry and related infrastructure. Before joining Arcadis in 2011 he worked as HSE consultant at Tebodin Consultants & Engineers. Carsten is valued by his clients because of his strategic view on environment, safety and risk management and his ability to lead change

## Oversee and manage enterprise-wide operational risks

Industrial sites spend increasing amounts of capital and operational resources on compliance with regulatory requirements. In the passed years, the majority of industrial investments in Dutch industry was related to meeting emission limit values in air and waste water, in reducing energy consumption and in updating safety provisions. The challenge is how to integrate compliance related expenditures in the business planning.

To manage the impact of changing regulations industry is anticipating on environmental policies. However, new regulations never seem to come at the right moment. Does it matter whether compliance expenditures have a positive impact on the competitiveness of an industrial site? Or is compliance a precondition that needs to be treated as a separate issue? Anyway, let's find a better way to plan the efforts on getting or staying compliant.

**TJEERD HENDEL-BLACKFORD**

is Senior Business Development Manager with Enhesa and has been with the company since 2000.

A dual British-Dutch citizen, Tjeerd has a background in European Environmental Law. He holds an LLB from the University of Warwick in the UK, and LLM from the College of Europe in Bruges, Belgium

## Enhesa's Global EHS Regulatory Forecast for 2017 and beyond

The Presentation will highlight global regulatory growth trends over recent years, and then look at the biggest regulatory issues likely to impact multinationals in the coming years. The presentation will draw on analysis of Enhesa's database of over 50,000 reports on EHS legal and policy developments, covering over 250 jurisdictions globally – as well as input from our in-house internal EHS Regulatory Analysts representing more than 40 nationalities.

**SAM TEMARA**

Lead EHS-Information Performance Driven Europe at Arcadis

Sam has over 20 years of experience in Environment, Health, Safety and Sustainability and IT implementation, governance and management. Prior to joining ARCADIS, Sam worked as a Partner at ERM and was Practice Leader, VP sales and Marketing at a Solvay branch company. Further Sam was involved at European Institutions (such as the ECHA and EEA). Sam is also teaching International Business Development in a Business School in Brussels and has a number of certifications in Software expertise and implementation methodologies.

## Getting Value from EH&S Information Management

Successful EH&S programs require management systems based on accurate and comprehensive data that drives compliance, performance, and risk management.

Focusing on best practices for getting value from EH&S information management, this practical workshop and round table brings invites industry professionals, industry associations and EH&S experts from the Netherlands, Belgium and Germany to collectively identify and share insights on how to combine EH&S and IT systems for superior performance.

This presentation will focus on how to create a vision, strategy, and project plan to achieve the digital enhancement and transformation of EH&S processes and systems.

**NEIL CURRIE**

Co-founder Development at Evision

The past 15 years Neil focused on software design and software interaction. As business analyst Neil has been involved in product design for numerous safety and operational software systems. Since 2003 Neil has done many different consultancy jobs within the Oil & Gas Industry, leading product design for complex environments within the E&P industry. Early 2008 Neil joined eVision, picking up the challenge to redesign Permit to Work software making it easy and simple to use by all, independent of IT skill level, age, culture, language or background.

## Control of Work: turning operational excellence into reality and a solid business case

Large Oil & Gas companies are setting up Global Control of Work projects to ensure all activities within the company are streamlined and the company operating requirements, safety standards and processes are adhered to.

For global companies eVision designed Control of Work system including a business case looking at workforce and asset utilization.

The system ensures tight (management) control and adherence to company operating requirements and business rules, while ensuring asset specific flexibility in process and function with full compliance to country specific regulations and gives management direct insight into day to day operations.

**NICO VAN RODEN**

Thought leader Safety at Arcadis

Nico van Roden has a wide experience in the process industry and mainly in the major hazard control area. In the day to day business he notices an increasing pressure on operational management in these companies due to growing legislative attention.

## Getting Value from EH&S Information Management

Special focus: Aging Assets and Assets Integrity.

The round table discussion will be focused on the main questions: "How can you keep up with the obligation for environment and safety with the ever decreasing dedicated means? Skilled and experienced operators leave due to their age, and equipment needs to be operational for very long times and the legislation requires more and more detailed and actual knowledge of the process."

Based on theses and practical experiences of the participants we will make an aggregated point of view of this situation and from Arcadis side we will suggest a possible direction for a solution.

**XAVIER STIFFEL**

Pre-sales director at Enablon

Xavier is in charge of all RFP/RFI bid management and functional answers to customer needs, in France and French speaking countries. His responsibilities include:

- RFP/RFI bid management and functional answers to customer needs
