

Shanghai: Delivering a competitive, world-class, modern metropolis

Shanghai, according to China's strategy and requirements, has a clear goal to develop into an international economic, financial, trade and shipping center by 2020. Shanghai's 12th Five-Year Plan sets out targets to progress the city and achieve this goal.

2014 population - 24.15 million

Projected population 2030 - 30 million

By 2015 – expectations from the 12th Five-Year Plan include:

Achieve an average annual GDP growth rate at about **8%** through 2015

Generate **¥8.7 Trillion** in retail sales in 2015

Cut the city's energy consumption per unit of GDP by **18%**

By 2015, boost investment in the energy-saving and environmental protection sector from 4% to 5% of the city's GDP:

Treat **85%** of urban sewage

95% of household waste processed without harming the environment

Ensure good air quality in about **90%** of days in a year

Key project activities

Hopson International Plaza

CallisonRTKL, an Arcadis company provided master planning and architectural design services for this 3.88 million square foot mixed use destination. Incorporating a 33-story office tower and a 23-story hotel tower on a shared retail podium. Connected by a network of pedestrian concourses and with extensive rooftop gardens, creating a unique urban oasis.

Shanghai Science and Technology Museum

Following an international competition, CallisonRTKL, an Arcadis company was awarded the complex task of designing a new science and technology center for Shanghai. The result is an architectural landmark and center of education and discovery benefitting the city, residents and tourists.

Shanghai DreamCenter

Providing cost management services for this world-class entertainment, culture, retail and creative-office development; the flagship project of the West Bund Media Port.

Ankangyuan Mixed Use Project

A large urban revitalization project with our key client Peal River Group incorporating retail, office, hotel, and residential. Delivering a range of services including master planning, architecture, landscape and interior design.

Caojiadu Urban Revitalization

CallisonRTKL, an Arcadis company is supporting the urban revitalization of Caojiadu through multiple projects, including a master plan approved by the city.

Arcadis acts as a Development Partner to support the on-going growth and construction of the Shanghai Free Trade Zone (SFTZ). A 'Memorandum of Understanding' endorses Arcadis as the government's partner of choice when it comes to providing interested parties with a number of services including feasibility studies, site consulting and project and cost management solutions.

Our Focus

Mobility

Creating integrated transport solutions to provide connectivity and transport choices. Advancing transport to connect people with cities. Enhancing connectivity with public transport.

Resilience

Establishing unique sustainable environments which respond to local climate and context. Protecting communities from climate change while enhancing ecological and urban design environments. Integrating resiliency with community design.

Regeneration

Developing and delivering projects that establish the highest quality living, working and business environment and support the delivery of a world class city. Unlocking value through the renewal of existing assets to deliver value to our clients.
