OUR ENVIRONMENTAL CAPABILITIES IN CHINA
Arcadis is a global natural and built asset design and consultancy firm working in partnership with clients to deliver sustainable outcomes that help to improve the quality of life. Through the work that we do, we are helping our clients to address the toughest challenges within the built and natural environments, delivering value for them and the communities and cities that we live in.

Throughout the globe we employ more than 28,000 consultants in more than 40 countries and deliver more than €3 billion in revenue. Within Asia we have access to almost 5,000 people based in over 50 offices across the region and enjoy a successful history dating back more than 80 years. Within Asia we have a dedicated team of environmental and safety & risk management professionals.

“"We partner with China’s largest and leading multi-nationals and have delivered over 1,000 projects in more than 60 cities in China since 2004.”"
STRATEGIC ENVIRONMENTAL CONSULTING

We use environmental and safety expertise to support client’s critical business investment, operating, and reputation decisions. By integrating environmental innovation along with safety and risk management, Arcadis is a leading player in developing technical and business-focused solutions that help underpin the safe operation, environmental sustainability and ultimate success of some of the world’s leading companies.

- Providing Business Assurance: offering certainty that operations and products are complying with EHS & regulatory obligations.
- Due Diligence: evaluation of environmental and safety liabilities from mergers, acquisitions and divestitures.
- Safety & Risk Management: safety and catastrophic failure risk management to protect employees, the public and assets.
- Site Evaluation: maximise investment returns by focusing on what is necessary to achieve the lowest life-cycle remedy.
- Site Restoration: deliver full spectrum of world class environmental and restoration programs to safely and cost effectively achieve targets and reduce risks.

SITE EVALUATION & RESTORATION

We bring industry leading restoration consulting and engineering expertise to plan and design the most appropriate solution to achieve a positive client outcome. We use innovative risk and remediation strategies to turn liabilities into assets.

- Financial and Risk Management: manage risks associated with environmental liabilities and asset portfolios.
- Restoration Strategy: collaborative consulting to develop an end-state vision and establish clear objectives that are aligned with business goals.
- Environmental Impact Assessment: anticipate and manage positive, potential negative/cumulative, intended/unintended impacts of projects.
- Site Evaluation: maximise investment returns by focusing on what is necessary to achieve the lowest life-cycle remedy.
- Site Restoration: deliver full spectrum of world class environmental and restoration programs to safely and cost effectively achieve targets and reduce risks.

ENVIRONMENTAL PLANNING

We understand that our clients are operating in an increasingly complex social and political environment and therefore, by addressing their challenges at an early stage, enable our clients to focus on their core business.

- Environmental Impact Assessment: anticipate and manage positive, potential negative/cumulative, intended/unintended impacts of projects.
- Environmental, Social & (Public) Health Impact Assessment: use effective solutions to assess corporate ESHiA requirements versus local EIA regulations.
- Ecology: protect and conserve biodiversity to avoid threats to ecosystems and improve the redevelopment and beneficial reuse of valuable natural resources.

All Environmental and Safety & Risk Management challenges are unique and as such require an offering that is specifically tailored to meet our clients’ needs. At Arcadis we focus on delivering measurable positive outcomes combined with outstanding credentials and technical excellence.

Our talents are aligned in the following value propositions.
